NORTHERN AND SOUTHERS TEACH-It is now very generally admitted that neither sectionalism nor polities should influence our school-board in their selection of a superintendent for the coming year. It is agreed that such considerations should be disregarded; and the way seems open to the board for teaching a southern school! He is

to choose a superintendent for his educational qualifications alone. But now a new-fangled idea is broached, that the brand cannot, under any circumstances, go to northern schools for their selection, because, forsooth, a northern teacher has no qualifications whatever eradicated; he will always, inevitably, teach false ideas to southern people; and he has that "invincible ignorance" our feelings, tastes and wants; that he is not sectionalism. Perhaps it is not. If not, why not?
